

“Are Real Men Becoming Extinct?...

I am red-hot blooded female who like millions of other women all over the globe keep looking at each other with the same WTF face asking this question:

Where have all the real men gone?

Where are the Marlon Brandos, James Deans and sex gods of our time?

You know...those über charismatic men who would walk into a bar reeking self-confidence and own it!

Ruggedly masculine men with panty dropping super powers that would not hesitate for a second to hit on the hottest chick at the bar and sweep her off her feet.

It seems modern men are too busy getting bronzed at the tanning salon... or treating themselves to a mani-pedi after a stressful day... or talking about their love for long walks on the beach at dateme.com to worry about their manly duties.

I've had enough of hearing women complain about their partners being more interested in getting their eyebrows waxed than getting in their pants.

Seriously...It kills me to watch men becoming more high maintenance than Paris Hilton!

Guys... what in Hugh Hefner's name is going on?

Where is your killer instinct? ... Why do I see so many of you second guessing yourselves?

There are record numbers of men failing in business... never have there been so many women unsatisfied in the bedroom...

It seems focus has shifted from picking up to plucking eyebrows, from closing deals to low fat meals, from being the boss to too much lip gloss, from drinking kegs to waxing legs...

Men... it's time to man up!

This is not just “the dawn of the metrosexual”... it runs much deeper than that.

Men are biologically changing and not in an evolutionary kind of way, actually it's quite the opposite... This biological mutation is jeopardizing the future of the entire human race and in just moments I will tell you exactly what it is.

But before I do let me ask you a few questions...

Are you sick of never getting the girl you want?

Have you ever had some under-qualified brown-nosing jerk get promoted instead of you?

Are you having difficulty sleeping, often feel depressed and underachieved?

Have you gained weight around your gut or find it extremely hard to put on lean body mass?

Are your erections not as frequent and ejaculations not as potent as they used to?

Have you found yourself losing your interest in sex and find it harder to approach women?

If you answered yes to any two of the questions I asked chances are you're being affected by this biological mutation crippling men.

Fact is you are not alone, this is happening everywhere!

Now before I reveal what this awful mutation killing men is... Here is some hard evidence vital for your understanding of the depth of this problem:

Worldwide, between 1940 and 1990 the average number of sperm in a milliliter of male semen dropped more than 50%. The percentage of men with extremely low sperm count tripled in the last half century.

Young adult males now produce just half of the sperm amount of their fathers...

Male's testosterone levels have also been declining 1.2% per year, making the drop 17% in the last 14 years...

Several studies show that men are less satisfied and less confident than ever before.

So, the common denominator between all of these alarming trends is the biggest mutation crippling the male race and that is: Declining Testosterone Levels.

Let's think about this for a moment...

What makes a man truly a man?

That would be testosterone, literally. A certain amount of testosterone at a critical moment shifts the fetus away from the basic human blueprint, which is female, onto masculinity.

Testosterone rises in adolescence boosting you into manhood.

And for the rest of a man's life testosterone, or the lack of it, defines your mental sharpness, confidence, muscle strength, lean body mass and sex drive... It even determines who your partners are. The things that make you feel best about who you are.

T = Good Looks = Confidence = Sex= Success = 

Good testosterone levels means you'll always be "in the zone": in in the boardroom, in the bedroom, in the club.

Now, if you have low T: you can forget about all of that.

A man with low testosterone is completely doomed to lack killer instinct, be an underachiever at work, have erectile dysfunction or loss of libido and be awful in bed...

Basically the guy who will never have the woman all guys want in his arm or be an outstanding performer at his dream job

People can pick up low T and confidence levels... women smell it like dogs smell fear.

In fact, a study performed by the Department of Psychology at The University of California supports women can somehow gauge a man's T levels by just looking at his face.

If you choose to stay on the Testosterone decline path you will be doomed to be the chubby guy that never gets the girl and is always overpowered by other people at work...

Look, this is not what I want for you and I'm sure is not what you want for yourself.

If you are O.K with being that guy you can leave this presentation now...

But I'm here to give you and millions of guys like you a hand so you can bring your A-game in all areas of your life by showing you the 3 dangers destroying men today and strategies on how to beat them...

In this short presentation you will have access to over \$650.000 worth of research and studies my team and I have analyzed over the past 5 years.

I have gathered all vital the information and compiled it in this presentation for men who want to know how to be that confident smooth criminal that's always ahead of the pack, who has the ability to make women's clothes fall off by simply looking at them.

This is information you deserve to know and today you'll get it completely free of charge...

I do need to warn you I don't know how long this video will be available free online as I'm considering turning it into a paid presentation...

So please watch it now while it's still up and while it's still free.

In just moments you will have access to a full step-by-step guide on how to become that strong and healthy, self-assured womanizer you are meant to be... So keep watching.

But first, let me introduce myself:

My name is Zoey Tyler I'm a 35 year old Dating Success Coach. Specialized in men.

In my 8 years of experience that has seen me help over 480 clients many of whom are in the celebrity world. I have done blogs, worked for recognized magazines and done T.V interviews.

With my experience I have realized, that what makes a man a real man is testosterone. That is the building block of a successful male.

I have seen men's worlds falling apart before their very eyes because of low testosterone. Some have sadly come to me for help after broken families, lost jobs and complete wrecked lives...

Let me give you an example of just one of my clients...

He's a professional golfer... To protect his identity we'll call him Dan.

Dan lost his drive. He didn't enjoy practicing anymore. His whole life had become a complete blur, he confessed.

Dan seemed to be tired all the time, irritable. In his own words... He just wasn't himself... he was misdiagnosed with depression.

But On April 2005, some blood tests showed that, at the age of 36, Dan had the testosterone levels of a 70-year-old man.

He was not only having problems on the course, the reason why he came to me is because his marriage was in huge trouble.

His wife was about to leave him cause he just didn't feel like giving it to her... ever.

Side note: We don't want to be the ones begging for sex, it takes the fun out of it in some part and rejection makes us feel ugly and neglected.

We want you to chase after us -even if we are married to you- just as much as you love "the thrill of the kill".

Sadly Dan's wife had been cheating on him. They tried to work things out but ended their marriage a few months after he found out.

This is a sad story but it's vital so you understand how women are pushed away by men who do not keep them happy by fulfilling their manly duties.

95% of the women I come in contact with don't feel wanted or desired by their partners... These women are brutally honest with me and admit sex or the lack of it is the No 1 reason why women end their marriages or cheat on their man.

So it's no surprise Dan's marriage was in trouble because of his low testosterone.

Which leads me to a very shocking trend: Men seem to have lost their interest in getting in our pants.

Counseling and sex therapy Relate says it has seen a 40 per cent increase in men who simply do not feel like making love to their wives and partners.

And it's not erectile dysfunction, or not being attracted by their partner.

Peter Bell, Relate's head of practice, said: "we have a lot of men who say, as women did in the 50s: 'I can have sex, but I don't want to. It's not rewarding'"

Males have been the dominant sex since... well, time immemorial. But now for the first time in history that's changing and at a damn scary speed!

Let's take a closer look to what's been happening to men as a species:

According to Australian anthropologist Peter McAllister, Neanderthal males could outrun Usain Bolt and easily beat Arnold Schwarzenegger in arm-wrestling...

But it's not just Neanderthal men that were very masculine...

* Roman legions completed more than one-and-a-half marathons a day carrying more than half their body weight in equipment.

* Athens employed 30,000 rowers who could all exceed the achievements of Olympic rowers.

* Australian aboriginals threw hardwood spears over 110 meters, over 10 meters longer than the current world record for javelin of 98.48 meters.

I hate to brake to you but the truth is men are just a weak shadow of their former selves.

Because of this crazy testosterone decline women are getting ahead of men in society leaving them in the dust.

Here's the proof:

In 1970, men earned 60% of all college degrees. In 1980, the figure fell to 50%, by 2006 it was 43%. Women now surpass men in college degrees by almost three to two.

For the first time in history women are better educated, more ambitious and more successful than men.

Women's earnings grew 44% in real dollars from 1970 to 2007, compared with 6% growth for men.

Also In 1950, 5% of men at the prime working age were unemployed. As of last year, 20% were not working, the highest ever recorded!

So I decided to focus my research on men's role in society, and the huge part testosterone plays in that role.

I have studied where men used to be, where they are and where they are going and I'm sorry to say the stats are fucking scary...

I know this is a lot of information and it may seem really overwhelming at the moment but I want you to think about this:

There are still some men out there with plenty survival instinct, who make their women scream in the bedroom...

Men who exude confidence and have a drive that makes them excel at the highest level in sports, in politics, in business... actors, investors, traders...

Girls want to date them, boys want to be them, they are "the alpha males"

So you may be wondering: "What do these guys have that I don't?"

Is it in their genes... or maybe is something you can control?

Strong evidence supports the theory that low testosterone levels make men LESS attractive to females, LESS self-confident, LESS likely to take risks – and LESS successful at work...

Testosterone is the most important hormone for males. It is secreted by your testes and as described by researchers at Emory University as “Nature’s own performance enhancing drug”

It is so important that reduces the risk of cancer, heart disease, stroke and basically every other chronic disease known to mankind... high levels of T make men get a natural high, making them feel happy, positive and confident.

Now, low testosterone on the other hand is associated with men losing their libido and having erection problems, nervousness, depression, bad memory, low focus, fatigue, insomnia, irritability, fat around the waistline, loss of muscle and poor athletic performance.

It is normal for testosterone to decrease as men age... The change happens so gradually most doctors don’t talk about “andropause”, a drop of testosterone that leads to depression and midlife crisis.

One study revealed only 11% of men with low testosterone have been diagnosed or treated for low testosterone... That means a staggering 9 out of 10 men with low T-Levels are suffering... is that you?

Men’s midlife crisis is not what you may picture either...

There is no taking two hot blondes for a ride in your brand new Porsche... it’s more like sitting in front of the T.V with a beer in your hand, growing a huge gut having lost all dreams of success and the appetite for sex.

In a recent experiment, researchers measured the testosterone of 76 men. Then the subjects were videotaped as they tried to get the attention of a hot female.

The results: Men with higher testosterone levels connected better with the hottie.

They also took control of the conversation and overshadowed the guys lower in the testosterone pecking order that were hitting on her.

Why? T makes you assertive as a sniper, which means you’ll have confidence to spare... *“a trait that women are attracted to”* says study coauthor Richard Slatcher, Ph.D., of Wayne State University.

You are a wise man Dr. Slatcher... We melt over guys who seem like they can take over the world!

Malcolm Carruthers in his book *The Testosterone Revolution* concludes “Men with higher levels of testosterone possess a higher degree strength, business motivation and sex drive than professionals with less”

A University of Cambridge study examined the testosterone levels of Wall Street traders, and found a strong link between how much testosterone they have and how much money they make on a given day.

The study suggests that testosterone levels dictate success, and success itself pushes up testosterone levels even further! Scientists call this the 'winner effect'.

Guys with high testosterone are bolder, more self-assured, and more likely to be a ladies man, finds a study in the journal *Social Psychological and Personality Science*.

In just minutes I'll give you a step-by-step guide on how to naturally increase your testosterone levels... But first you absolutely must know about the 3 testosterone killing dangers destroying men... Here they are:

The 1st Danger: Electromagnetic Radiation

According to Tim Ferriss in his book, *The 4-Hour Body* ... *"more than a handful of studies showed significant decreases in serum testosterone in rats following even moderate exposure to 900 megahertz radio frequency electro-magnetic fields"*

This is exactly what most cell phones and other GSM devices produce... and the decrease happened with exposure of just 30 minutes per day, 5 days a week, for 4 weeks.

Tim continues, *"Of the dozens of studies that I found, most done in Europe, more than 70% concluded the same thing: cell phone radiation impairs sperm function."*

In a report in the "Fertility and Sterility" medical journal, Argentinian scientists describe how they got semen samples from 29 healthy men, placed a few drops under a laptop connected to the Internet via Wi-Fi and then hit download.

A few hours later, the semen was, eh... well-done. A quarter of the sperm were no longer swimming around...

The culprit? Electromagnetic radiation generated during wireless communication.

This means you're being exposed to harmful rays that attack you multiple times per day... For example when you're sitting with your laptop inside Starbucks or reading a book on your iPad... Even around the office! The family jewels may be getting fried right now as you are watching this.

Tim Ferris tripled his sperm count when he simply stopped carrying a cell phone in his pocket. So please, Put your laptop on a desk or at least use a pillow... strap

your phone on your arm or buy a man purse for all I care but please keep them away from Mr Jhonson...

The 2nd danger is “cortisol”, a deadly hormone produced by stress.

Ok, Life can be a bitch... I know

The more you live, the more stress you experience... each day brings a handful of ball-busting expiences!

Some of it comes from the trashy news on TV, some comes from the 100 emails and 20 texts you've just received... some comes from upcoming deadlines and assignments...

The freaking economy doesn't help... In fact, 80% of Americans say that the economy is a significant cause of stress... and 50% are increasingly stressed about their ability provide for their family's basic needs...

There's also 'family stress'... Instead of getting it on you're getting in fights with your wife, the Ferris Bueller you may have for a son, maybe a pregnant teen or even a newborn that wakes you up in the middle of the night...

Stress is the root cause of up to 80% of all disease... It contributes to heart disease, high blood pressure, strokes... it lowers your digestive function, immune system and sadly... it also kills your T levels...

When your body is under stress it increases your level of cortisol, the death hormone,

Cortisol, a steroid hormone produced by your adrenal glands, is the polar opposite of testosterone, basically its evil twin...

New psychology research triggered by the University of Texas at Austin shows that elevated levels of cortisol block testosterone's influence in competitions.

It makes sense that during an emergency winning or sex becomes no longer important... but chronic stress maintains your cortisol levels elevated all the time!

This lowers your testosterone, immune function and more!

I'll tell you all about how you can keep your cortisol under control and skyrocket your testosterone in just a moment... For now just keep in mind that sleep is nature's way to restore the calm by lowering cortisol and replenishing testosterone...

The 3rd danger is estrogen-promoting toxins, especially plastics!

This is ridiculously scary: People who drink a lot out of plastic bottles have high plastic readings and lower testosterone levels. Strength and performance coach Charles Poloquin believes plastics are highly dangerous to men...

Plastic is the #1 pollutant of the human species. We use it everywhere... from credit cards to forks, knives and bottles... Today our entire global water supply is already contaminated by plastic.

Plastics are filled with xeno-estrogens or fake estrogens... These are environmental hormones that interfere with the natural hormones in your body making them act crazy!

Estrogen is typically a female hormone and high levels in males are responsible for excess fat and lower testosterone levels... In fact, health expert David Wolfe states too much estrogen without the right level of testosterone to oppose it, results in cancer...

The situation is so severe that the average level of estrogen in 54-year-old males is now higher than the level of estrogen in 59-year-old women... and you're losing your nuggets because of it...

The good news is that high testosterone levels will automatically lower estrogen levels... and you're about to discover powerful tips to naturally increase testosterone production.

Here's a must-know-tip, Heat makes plastic unstable and causes it to leak into food and drinks... So, do not microwave your food in plastic containers or let your water bottle stay out in the sun for long periods of time.

Now that you know the problem and you understand that your development as an highly evolved, highly successful Casanova has been held back by this toxic conspiracy, let's dive into some of the tips I have for you today....

These are the same methods I've used to deliver many of my clients from self-questioning, unconfident, losers to self-assured, unstoppable superstars.

Our primal ancestors ate the fattest animal they could hunt... There were no grains and sugars back then... It was all meat, green shoots and leaves, roots and maybe some fruit...

Research shows that men who eat more fats have higher testosterone levels than those eating more carbohydrates....

Sugar is the #1 cause of high levels of obesity, stroke, heart disease and cancer in man and women alike...

Plus, it instructs your body to store fat, increasing your estrogen levels and decreasing your testosterone even more.

Fats on the other hand... I'm talking about healthy fats like avocados, nuts, and even saturated animal fats... are very well metabolized by our bodies and filled with nutrients. 60% of your brain is fat and all of your hormones are synthesized from fats...

So start eating like a caveman... Yes, that means steaks (grass-fed beef is best), eggs including the yolk, fish, avocados and other healthy fats such as oils, nuts and seeds... You will get leaner and naturally increase your testosterone...

Here are a few more rules for maximum testosterone release...

1. Stop drinking like Homer Simpson and go home after 3 glasses... Alcohol eats into your testosterone levels as well.

2. Have sex at least once a week! Oh yeah... tell your girl its Doctor's orders!  Just having a boner increases your testosterone... Have a morning treat, it's best because your testosterone levels are highest when you wake up.

3. Steer clear of soy and grapefruit... soy increases your estrogen, decreases testosterone and lowers your sperm count! Though grapefruit is a miracle fat burner actually makes it hard for your liver to break down estrogen!

4. Eat cruciferous vegetables like broccoli, radishes, turnips, cabbage and Brussels sprouts to increase the amount of free circulating testosterone in the body... They also have the ability to stop the buildup of bad estrogen.

5. Supplement with the right vitamins and herbs. This is probably one of the easiest, fastest ways to boost your testosterone levels.

Choosing the right testosterone boosting supplements is CRUCIAL for any man who wants to quickly restore his testosterone levels....

But first... I strongly warn you AGAINST testosterone replacement therapy... - whether by injection, patches, cream, gel or oral form. Also stay away from performance enhancing drugs in the form of anabolic steroids.

That stuff is evil! It can seriously increase the risk of prostate cancer and man boobs... which is the single most unattractive feature a man can have...

Artificial hormone therapy increases the risk of stroke and liver toxicity... and can make your testicles shrink and shut down the production of sperm...

Of course, each individual male reacts differently but the truth is that you were not designed to swallow hormones because they were never intended to go inside the digestive tract.

I would also suggest you stay away from any mumbo-jumbo herbs that have not been proven to work... like Fadogia ... or from herbs that are unbalanced and could cause secondary effects like Horny Goat Weed.

After all this research, I can say only a handful of herbs are proven to be affective for thousands around the world and I recommend.

The #1 herb by far to boost testosterone levels is Tongkat Ali or Longjack for westerners...

Touted in Asia for its ability to increase PENIS SIZE, the Malaysian government began to closely research the herb.

In their studies, they discovered that Longjack increased testosterone levels and then IDENTIFIED the active chemicals responsible for the documented effects.

These "Eurypeptides and Glycosapins" have been CLINICALLY PROVEN to not only increase total and free TESTOSTERONE, but to also increase the human growth hormones HGH & IGF-1, while simultaneously decreasing cortisol, the death hormone.

In plain English, Tongkat Ali has the ability to make you hormonally younger... by making 3 to 4 times more testosterone available to you.

Tongkat Ali works amazingly well. It is the closest nature has ever come to creating the perfect aphrodisiac and is a giant among male sexual tonics.

Yet not all Tongkat Ali extracts are the same...

Most herbal supplements use powdered Tongkat Ali root.... You would need to gulp those down by the bottle to get any measurable increase...

Other manufacturers advertise their extract as 50x strength... or even 200x strength... But their extracts are not standardized and are probably a waste of money because there's no way to test and compare their claims...

Now, there is one extract that beats all others... t's the most potent form of Tongkat Ali and comes with clinical trials and standardized active substances in the form of 40% GlycoSaponins and 22% bioactive Eurypeptides : LJ100

It's freaking powerful stuff! It's been researched and produced by the Malaysian Government in a \$3 million dollar state-of-the-art manufacturing facility with quality control and testing standards that exceed United States GMP standards.

It's an awesome male rejuvenator and provides 5 main benefits:

1. It boosts testosterone

In vitro LJ100 increases testosterone in mice by 480% and in human testicular cells by 440% (Dr. JohariSaad, PhD). Another clinical trial involved athletes using it in real world scenarios... The group taking it experienced a 132% increase in free testosterone measured in saliva.

2. It inhibits SHBG

SHBG is the Sex Hormone Binding Globulin that blocks testosterone from moving freely inside your body and being available. 66% of patients in a clinical trial showed a decrease in SHBG after 3 weeks. Their free testosterone level also increased by 73% in 3 weeks. The additional testosterone improves energy and sexual function, increases metabolism, and helps reduce body fat.

3. It increases DHEA

DHEA is another popular anabolic hormone, similar to testosterone. In fact, DHEA is ultimately converted to testosterone and this extract increased DHEA by 47% after 3 weeks. (Dr. Ismail Tambi)

4. It increases IGF1 –

Insulin-like Growth Factor-1 is a natural anabolic growth factor. It regulates cellular growth and development. Premature reduction in IGF-1 causes cell death. IGF-1 stimulates muscle bulk and lean body mass, helps burn fat, promotes healthy blood sugar level, and decreases cholesterol.

5. It decreases cortisol

LJ100 helps modulate Cortisol levels. Cortisol, the stress and death hormone, regulates blood pressure, cardiovascular function, the body's use of proteins, carbohydrates, and fats.

(order button appears here)

Other powerful testosterone herbs include TribulusTerrestris and Ginseng.

Tribulus has also been the victim of supplement industry deceit. Here's the deal, the traditional TribulusTerrestris PLANT from China and India is almost useless.

In order for Tribulus to have any effect it needs to be Bulgarian Tribulus standardized for protodioscin.

Chinese and Indian Tribulus Terrestris are made from a different part of the plant and harvested at a different time of the year. These plants are standardized for saponins, which have powerful anti-viral and anti-bacterial effects but do nothing to your testosterone levels.

Bulgarian Tribulus Terrestris contains the saponins but it's also standardized for protodioscin, which is the actual compound that increases your free testosterone levels.

This is the active stuff that you want. Don't be fooled by imitations!

Tribulus Terrestris has also been reported to increase libido, ejaculatory volume and semen count... It acts as an aphrodisiac and nitric oxide booster making it easier to achieve erections... Tribulus also bumps your free testosterone levels and provides benefits for your immune system.

You can order a high quality supplement that includes Tongkat Ali and Bulgarian Tribulus from Sacred Eden by clicking the yellow "Start Here" button below this video.

Ginseng is probably the most popular erection-enhancing herb known to western men... High doses provide raging hard-ons, extra stamina and huge boost in volume of ejaculate...

Long-term safety has been studied and it's considered a superior tonic in Chinese medicine providing multiple benefits inside your body...

Allow me to properly introduce Sacred Eden's #1 male rejuvenation product called "Advanced TestoBoost"

This herbal formulation contains a blend of the most effective natural remedies known to increase testosterone levels...

Ingredients include the highest quality extracts: Tongkat Ali LJ100 (do not be fooled by imitations), Tribulus Terrestris with 20% Protodioscin and Ginseng, standardized for 20% Ginsenosides...

The potent extracts are enhanced by a proprietary "Activation" blend including Long Pepper, Zinc and L-Arginine...

Long Pepper extract increases metabolism and provides benefits for the circulatory system... In fact, piperine speeds up absorption of the other ingredients in our formula and makes them more active in the blood.

Zinc deficiencies are associated with decreased testosterone production and lower testosterone levels so the Zinc in the formula is going to take care of that...

Finally, L-Arginine is an amino acid that is known as a growth hormone releaser and a precursor of the vital substance nitric oxide. Nitric oxide is what allows blood to flood your penis and create an erection... Arginine is also a powerful immune stimulant and wound-healing agent.

Advanced TestoBoost is the #1 scientifically-proven formulation for men who want to see dramatic results in their muscle mass, confidence and energy levels...

All you need to experience results is take 1 cap of **Advanced TestoBoost** twice a day. You will feel results in as little as 3 weeks. However, we do recommend a 6-month treatment period. **Advanced TestoBoost** is all natural and it's impossible to overdose on it...

Imagine your life when you have the testosterone levels of your younger years at your current age...

You'll find yourself with competitive spirit and drive to take over the world; your leaner and healthier physique will give you confidence to be the lady's man you had in you all along.

You will be the "alpha male" in all areas of your life. You will be more dominant. You might get a raise... and who knows maybe get that hot chick everyone will be jealous of.

Your increased sex drive and prolonged erections will allow you rock the bed everytime... without harmful pharmaceutical enhancing drugs. You will release your sexual energy and your girl will be happy and pleased!

Trade the depressive cycles of low energy, anxiety and mood swings for a happier and healthier life!

Now, you may think a supplement with so many perks might cost a fortune... and to be fair it should... after all how much is your success and happiness worth to you?

Is it \$100? \$1,000?...\$100,000 maybe?

How about \$67? That's more than reasonable for a 30 day treatment of a product of the highest quality and proven effectiveness.

However, you're not going to be paying anywhere near \$67 today...

Just because you watched this presentation and because I want to lower the price today...you'll be able to order it for just \$49.95. That's \$1.6 a day... That's a truly low price for your hormonal health and it's not even the price of a good coffee.

This offer is available through Sacred Eden's convenient auto-ship program where every month you receive a 30-day supply until you tell us to stop.

That means we will charge your card \$49.95 every month and ship you a fresh month's supply without you having to worry about running low.

Our 800 number is clearly displayed on SacredEden.com & on every bottle and our support agents are available 7 days a week

You also get free shipping, which we normally offer only for orders over \$60... yet today your order will be rushed free of charge...

Additionally, you can order a 3-month treatment or 6-month treatment and get further discounts.

After a few weeks on Advanced TestoBoost you will feel happier... get better sleep and therefore be more energetic during the day... you'll be able to make your girl roar in the bedroom... day or night ☺

Here's what Edward, 45 yo from Pennsylvania had to say about the supplement...

" I noticed results the first day that I started taking it. I couldn't keep my hands off of my girlfriend. I experienced really intense, almost overwhelming sexual desire. My confidence has also increased greatly... I feel like I'm on top of the world for the first time in years"

M. Fischer 56 yo from Melbourne said, " Helps my swollen prostate issues. I can urinate easier and my erections are harder. Sometimes I wake up with a bully and I'm 50. Hadn't had that happen since I was a young man."

O.K now it's up to you... you have all the information in your hands and the latest research to back the most effective herbal supplement in the world... This amazing supplement will boost your testosterone naturally without the side effects of hormone replacement therapy.

This is your chance to be a real man again... the man you were always meant to and deserve to be... You are the alpha male! If you want something go and get it!

Click the Yellow “Start Here” Button Under This Video To Order “Advanced TestoBoost”, the clinically tested formula that boosts testosterone levels without negative side effects.

There are two other things I need to let you know.

The first is that your purchase today is 100% guaranteed by Sacred Eden’s 90-Day Money Back Policy... we guarantee complete satisfaction or pay nothing at all... if you are not ecstatic with the results... or even if you don’t like the shape of the bottle... I’ll be more than happy to give you full refund even if the bottle is empty!

The second thing is from time to time we run out of stock for this product since it is produced in small, controlled batches. It has sold out and people had to wait for weeks to get it... So if regaining your hormonal youth is a priority for you, please act now and get it before it’s too late.

Look below this video right now: Click the Yellow “Start Here” Button Under This Video To Order “Advanced TestoBoost”, the clinically tested formula that boosts testosterone levels without negative side effects.

So... you’re still here. That means you must have some questions. That’s fine, I’m here to answer for you our most FAQ:

Q: I’m only 25... Will this work for me?

A: Absolutely... It works for any male over 21.

Q: Is this really the best natural way to increase testosterone?

A: Yes... All of the extracts used in this product are of the highest quality... Tongkat Ali is standardized for 40% GlycoSaponins and 22% Eurypeptides, Tribulus Terrestris for 20% Protodioscin and Ginseng for 20% Ginsenosides.

Q: How should I use this product? How many pills a day?

A: All you need to do is take 2 pills a day, one in the morning, one in the evening. Older men who want a bigger surge in their testosterone levels and professional athletes are encouraged to double the dosage.

Q: Are there any negative side effects?

A: The toxicity tests performed on LJ100 prove that it's safe enough to eat it by the cup. At 12 times the daily recommended dosage, Dr. Ismail Tambi saw no changes in full blood profile, renal function test, liver function test and various tumor markers, including PSA.

Q: How do I know if I'm getting results?

A: Most people don't like needles or taking blood tests. But if you are not, you don't need to take my word for it because you can find out for yourself... Place your order for Advanced TestoBoost right now and then call your doctor or human performance specialist for a blood test. Ask for your levels of Estrogen, Total Testosterone and Free Testosterone. Use our product as indicated for a month and then go back for another test. Let us know how you did.

Q: Do you have a satisfaction guarantee?

A: Yes, your investment today is 100% protected by our no questions asked 90-day money back guarantee.

Now, look below this video and Click the Yellow "Start Here" Button To Order "Advanced TestoBoost", the clinically tested formula that boosts testosterone levels without negative side effects.

- I am red-hot blooded female who like millions of other women all over the globe keep looking at each other with the same confused face asking this question:
- I have studied where men used to be, where they are and where they are going and I'm sorry to say the stats are extremely scary...
- Ok, Life can be tough... I know
